

# H2-tank system B4S-SM

## BOR4STORE

**boron hydride • single module • solid state**

**for a fast, reliable and high capacity solid state hydrogen storage future**

Novel, optimised and cost-effective boron hydride based H<sub>2</sub> storage materials (reactive hydride composite: 2LiH + MgB<sub>2</sub>) at superior performance (capacity > 8 wt.% and 80 kg H<sub>2</sub>/m<sup>3</sup>) for specific fuel cell applications (e.g. SOFC).

	<b>at a glance:</b> <ul style="list-style-type: none"> <li>• H<sub>2</sub>-capacity: 40-50 g</li> <li>• volume: 712 cm<sup>3</sup></li> <li>• weight: 25,5 kg</li> </ul>
<b>BOR4STORE - single module tank system</b>	
	
<b>typical absorption cycles</b>	<b>typical desorption cycles</b>
<b>features:</b> <ul style="list-style-type: none"> <li>• novel boron hydride based materials and composites</li> <li>• accelerate reaction kinetics and adjust reaction temp. appropriately to supply a SOFC</li> <li>• enhance the cycling stability of the materials to several 1000 cycles</li> <li>• electrical heating, electrical control and surveillance</li> </ul>	
<b>operating parameters:</b> <ul style="list-style-type: none"> <li>• pressure: 3-100 bar</li> <li>• temperature: max. 650°C</li> <li>• charging pressure: 50-60 bar</li> <li>• charging temperature: max. 350°C</li> <li>• design pressure: 325 bar</li> </ul>	
<b>TÜV-approval (2016-03)</b>	<b>price: on request</b>
